

## Fire Collars and Wraps

Talon Intumescent Fire Collars are suitable for plastic pipes (UPVC, PP, PE and ABS) where they pass through fire resistant structures such as walls or floors. In the event of fire, an intumescent core within the collar rapidly expands to crush the heat softened pipe, sealing off the area, delaying fire spread and maintaining the fire integrity of the structural element.

### Intumescent Fire Collars - 2 Hour Rating

FIRE RATING: Tested to BS476 Part 20 for 2 Hour in vertical / horizontal application.

Product Code	Size	Pack Qty
FC2H110	110mm	1
