

Pipe Cover

Talon Pipe Cover has been designed to offer a compact, neat and easy solution where unsightly pipework needs to be covered.

Available in 15, 22 & 28 mm single and 10, 15 & 22mm double styles, it can be fitted directly onto the Talon Interlocking Style Hinged Pipe Clip – an integral part of the Talon Pipe Clip range (see page 4).

Manufactured in extruded white uPVC, this quality grade material is rated to a UL94 V-0 flame spread rating. It is also resistant to both mild acids and alkalis.

Talon Pipe Cover has excellent resistance to weathering making it suitable for both interior and exterior use.

Correctly supported, Talon Pipe Cover can be used at temperatures ranging from -10°C to $+60^{\circ}\text{C}$ if in direct contact with pipe. Cover can be used with pipe heated to $+80^{\circ}\text{C}$ if not in direct contact.

A wide range of accessories is available (see page 25).

Backplates are also available to offer additional support or when fixing over existing paperwork.

Pipe Cover

Single Cover

Code	Size	Length	Pack Qty
CVS15/3	15mm	3m	12 lengths per pack
CVS22/3	22mm	3m	12 lengths per pack
CVS28/3	28mm	3m	12 lengths per pack

Double Cover

Code	Size	Length	Pack Qty
CVD10/2.5	10mm	2.5m	12 lengths per pack
CVD15/2.5	15mm	2.5m	12 lengths per pack
CVD22/2.5	22mm	2.5m	12 lengths per pack
CVD10/3	10mm	3m	12 lengths per pack
CVD15/3	15mm	3m	12 lengths per pack
CVD22/3	22mm	3m	12 lengths per pack

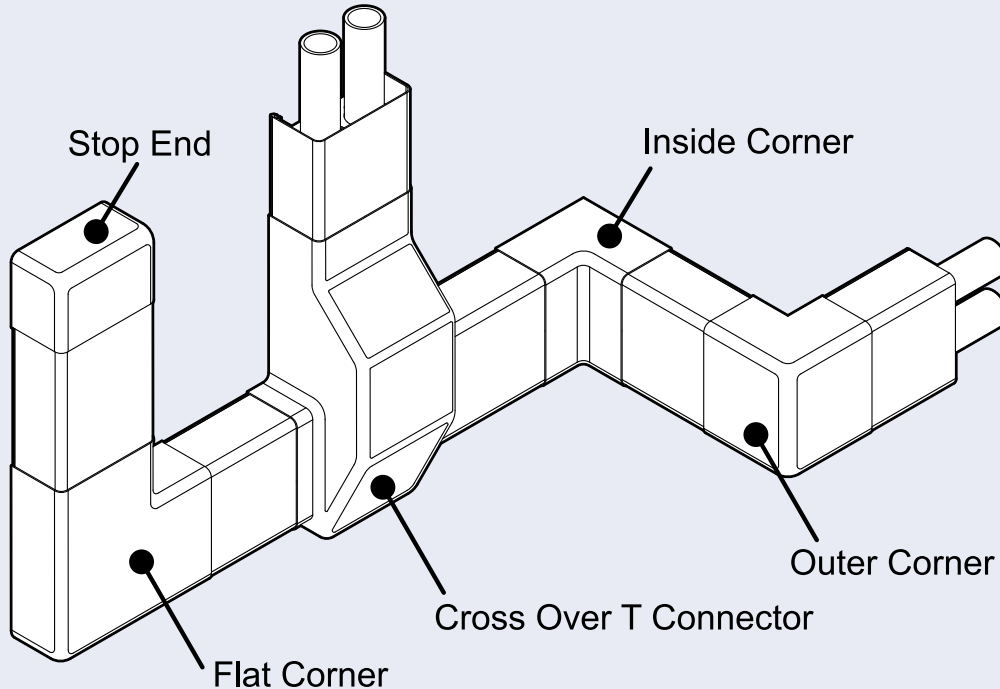

- Cover snaps directly onto clip

Suggested Specification

All 10mm, 15mm, 22mm & 28mm pipework should be fitted with Hinged Pipe Clips (see pages 4 & 5) from the Talon 'TS' (single) or 'TD' (double) Interlocking range. Where exposed pipework needs to be covered Talon uPVC Pipe Cover should be used fitting directly onto the Talon Interlocking clips.

Pipe Cover Accessories

A full range of accessories is available to suit the double cover making it perfect for most applications. The accessories should be attached to the cover using uPVC Solvent Weld.

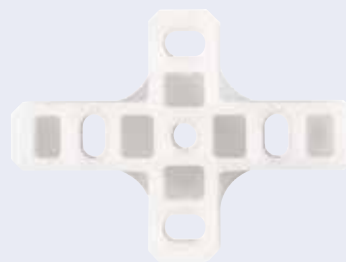

Backplate for retro fitting

Backplates are useful when retro fitting cover over existing pipework where a different style of pipe clip has been used.

Backplates can also be used to give extra support to the cover in difficult situations. Backplates are available for both single and double cover.
